Dear Sir

IINVITING COMMENTS REGARDING THE DRAFT RADIO FREQUENCY MIGRATION PLAN 2018

1. Altech Netstar is a vehicle tracking and recovery company with over 600 000 clients.
2. We utilize our own RF Networks to locate and recover our client's stolen / high-jacked vehicles.
3. Our RF Networks utilizes in 400 MHz UHF band for its Paging Links and repeater links and on 170.900 MHz countrywide for activation of tracking units in the vehicles.
4. When the tracking unit in the vehicles is activated, then, it transmits on two frequencies of 915.025 MHz and 915.050 MHz for tracking and recovery purposes by Altech Netstar Tracking Teams.
5. All the Frequencies in both UHF, VHF and in 915 bands are licensed frequencies by ICASA.
6. Due to high number of our client's base, our licensed frequencies should not be targeted for any migration plan by the authorities.

Your support and cooperation much appreciated.

SOHIEL SHAMS

Manager: RF Networks
